IT'S BEEN HOLY HELL WEEK

JUST TOO CLOSE: The lack of communication between official sources and not knowing the exact location of the Holy Fire and the direction in which it was burning, created much anxiety and a sleepless Monday night for Temescal Valley residents -- especially those in Horsethief Canyon Ranch. Supervisor KEVIN JEFFRIES stepped in to coordinate communications between all involved agencies and personally posted updates for Temescal Valley. This photo of flames above Horsethief is from video recorded by resident MATTHEW HOAG at 3 a.m., Tuesday, Aug. 7.

Fire info, updates as of press time

MANDATORY EVACUATIONS: Glen Eden, Horsethief Canyon Ranch, Sycamore Creek

EVACUATION CENTER: Temescal Canyon High School, 18760 El Toro Road, Lake Elsinore

SCHOOLS: Luiseno School and Todd Academy are closed until further notice. Status of Temescal Valley Elementary will depend on fire conditions. It is assumed status of Temescal Canyon High, now serving as evacuation center, depends on evacuations being lifted.

Blaze reinforces need for Fire Safe Council; meeting Aug. 30

Plans to create a **Temescal Valley Fire Safe Council** were announced in the July newsletter. What residents have experienced this week with the **Holy Fire** underscores the need for the formation of a council as soon as possible.

An organizational meeting is scheduled at 6:30 p.m., **Thursday**, **Aug. 30** at the **Sycamore Creek Interpretive Center**, 11875 Indian Truck Trail. The Holy Fire and community needs will be discussed. Representation from all Temescal Valley neighborhoods is imperative.

The goal of the **California Fire Safe Council**, a nonprofit state agency, is to mobilize citizens and empower them to protect their homes, communities and environments from wildfire.

Local councils not only promote fire protection and prevention by encouraging fire-safety education, but also develop communitywide fire management plans. The council provides a forum for residents to discuss, analyze and solve fire-related issues before they become a crisis – such as weed abatement and the illegal use of fireworks. Grant funding for fire-reduction projects also is available to local councils.

Edison launches strategy for wildfire safety, mitigation

By KELLI NOSS Team Leader Temescal Valley Disaster Response Team

Wildfires are now a year-round threat in California. Southern California Edison (SCE), hosted a Wildfire Mitigation, Safety, and Grid Resiliency meeting last month at its Wildomar office to discuss the company's strategy for what is considered the "new normal" fire season for our state.

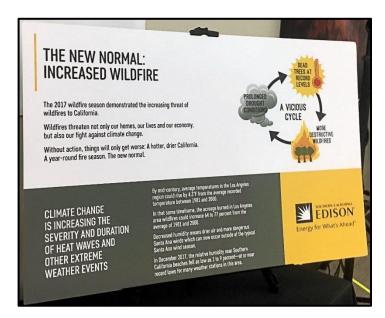

Due to a combination of factors including drought, record levels of dead trees and other fire fuel, and increased prolonged hotter, drier weather conditions, fire season is no longer traditionally limited to the summer and early fall months. SCE presented its new, multi-faceted approach in navigating this new normal.

First, utilizing a new network of weather stations, a team of meteorologists and a 24/7 staff-monitored awareness center, SCE said it can stay ahead of potential red-flag situations throughout its territory.

This also includes 360° cameras on Santiago Peak with more planned within the next year to better pinpoint fire danger and

"CAN YOU HEAR ME NOW?" Verizon is counting on better service for customers with the installation of this cell tower on Temescal Canyon Road adjacent to the IvyGlen substation.

THE NEW NORMAL: Placards such as this one and a PowerPoint presentation were used to introduce Southern California Edison's Wildfire Mitigation, Safety and Grid Resiliency plan.

assist response agencies in putting out flames as quickly as possible.

Second, the electrical equipment on SCE's grid is being upgraded to new "hardened" fire-resistant products to better mitigate damage, as well as potentially prevent combustion damage that can lead to fire, with better insulation and internalized protection.

The third piece of the presentation focused on **Public Safety Power Shutoff** (PSPS), which SCE considers a last resort to mitigate wildfire risk when conditions point to extreme fire danger or when a wildfire breaks out near power lines.

When a PSPS is called, SCE will shut down the power in the threatened area ahead of potential damage. Once the event passes and SCE can inspect its equipment for potential damage, power can be restored to impacted customers.

Additionally, SCE has stated it would like to present this information at a **Temescal Valley Municipal Advisory Council** meeting to explain how it specifically impacts our valley with the upcoming proposed grid projects.

A BICENTENNIAL MOMENT . . .

TEMESCAL VALLEP

Did you know Temescal Valley is older than

Riverside County? At one time, Temescal Valley was in San Bernardino County. Riverside County was established in 1893 and was carved from land in San Diego and San Bernardino counties. San Diego County was founded in 1850 and San Bernardino County in 1853. Leandro Serrano established his Rancho Temescal in 1818. Learn more historic facts on our bicentennial page: www.wearetv.org/bicentennial and join us at 9 a.m.,

Saturday, Aug. 18 for our next committee meeting in the Temescal Room at the Trilogy Lodge, 24503 Trilogy Parkway.

JULY PHOTO WINNER

The theme was "Keeping Cool in Temescal Valley."
